"My Inspiring Future Career"

Scientist are magical. They learn a lot and that is wonderful.
They mostly study with fellow dreamers, and sometimes they study different creatures.
But, the scientist I want to be, is a scientist who can see!
By see I mean that they care for others like I care for me.

And with the cures I make,
they bring joy to every face.
Big or small, I care for all.
As I make my mark as the scientist who helps people feel better,
I help lift them as they are stars!
